Bear Down Bank
WILDCAT CARD PROGRAM

Renee Castillo, Director of Card Operations, Bear Down Bank

Sonoran Analytics tells you exactly which cards to replace, and what it will cost, on one page.

Prepared for Data Visualization, University of Arizona. Course scenario using a provided dataset.

Problem

440 non-contactless cards will stay in customers' wallets until April 2027 or later

The other 1,253 cards renew by March at no extra cost.

440

Non-Contactless Cards
Expiring April 2027 or Later

211

Of Those 440 Cards
Expire more than a year out

Data as of September 30, 2026.

Sonoran Analytics

Approach

We’d turn your card extract into a priced replacement list and update it as cards expire

Questions We Answer:

Which contactless cards should be replaced early?

What will each batch cost?

Data We Use:

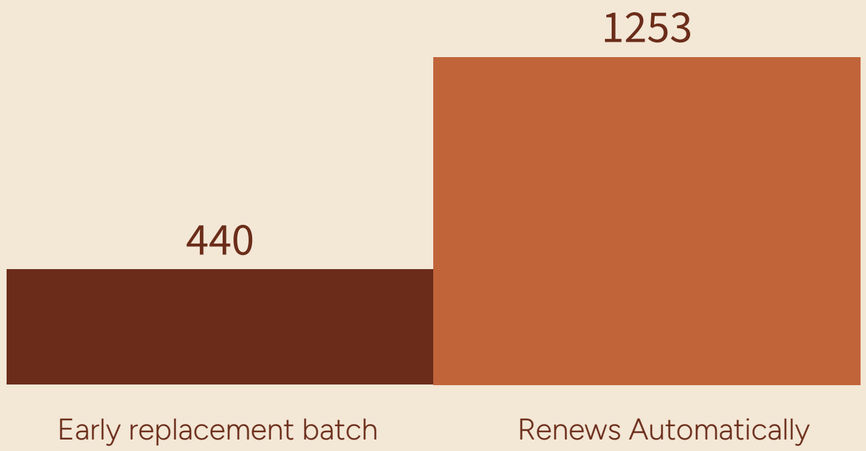

Your customer and card extracts, with names, addresses, card numbers, and security codes removed

What You See:

A priced batch list at the start of each stage, with a refreshed count before the next one.

Our work sample already prices the early batch at $3,520

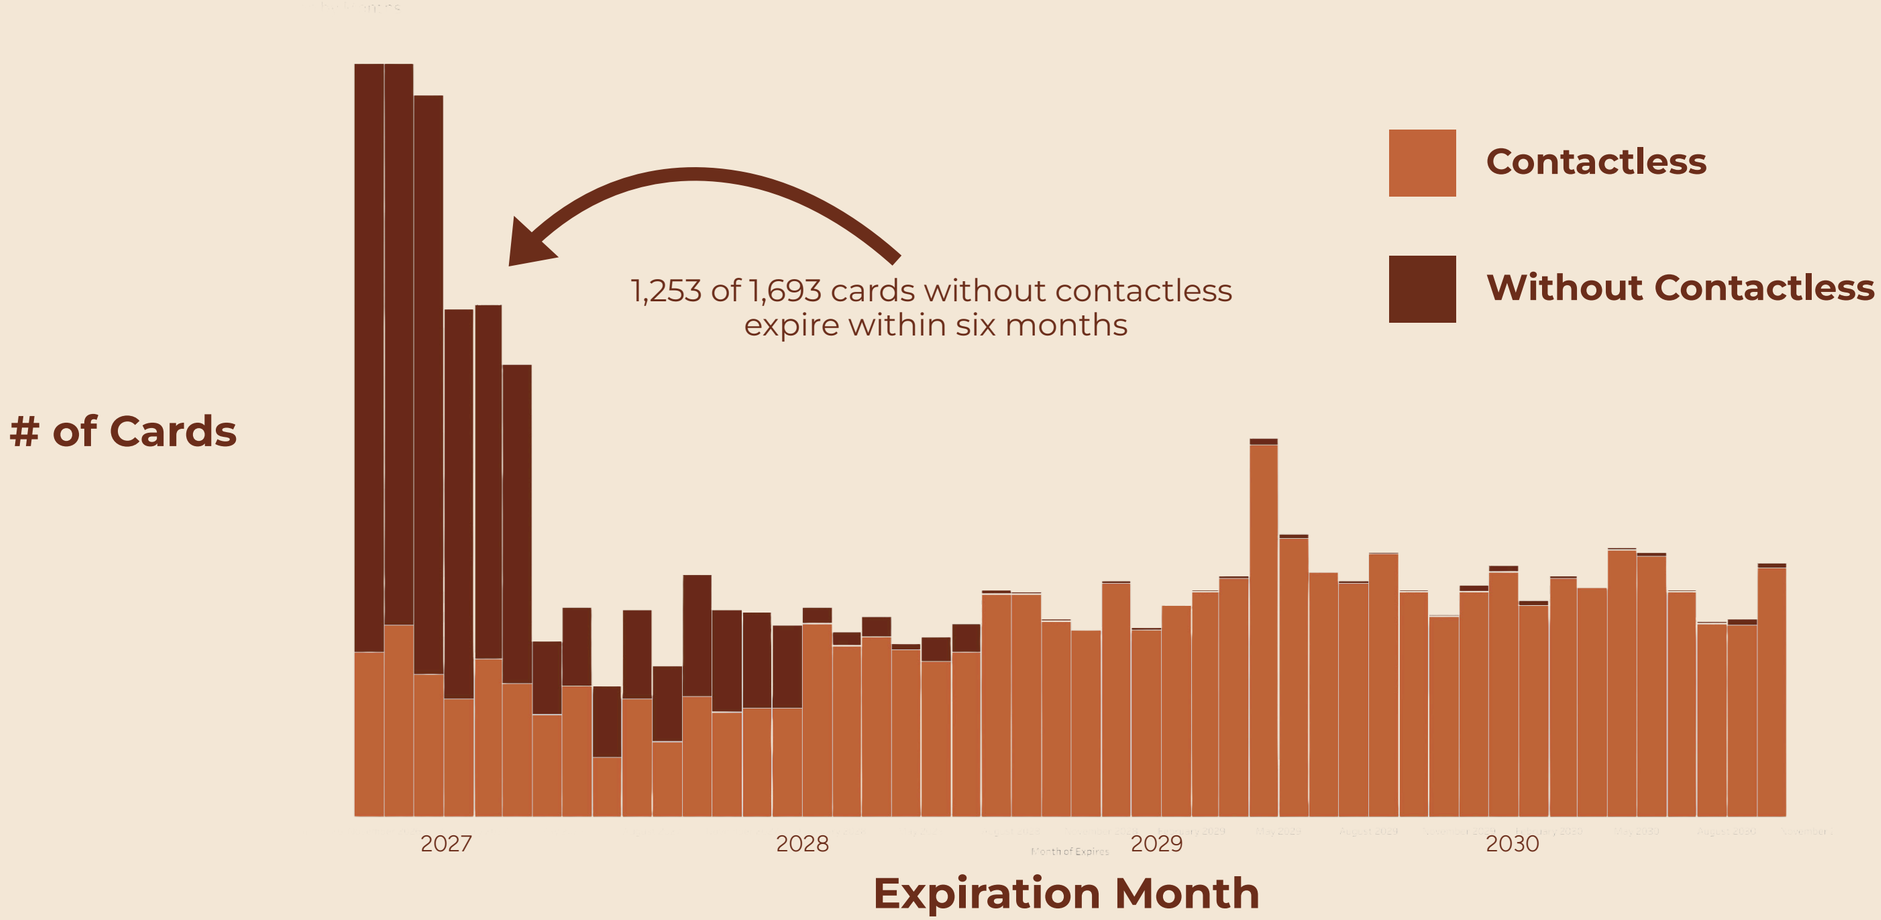

440 cards at $8 each

7-12 Months	229 Cards	$1,832
12 + Months	211 Cards	$1,688
Totals:	**440 Cards**	**$3520**

Data as of September 30, 2026.

Many cards without contactless expire soon, so timing decides which ones need early replacement

We would replace the 229-card group first, then refresh the list before the 211-card group

Stage 1

Card-level list for the 7-12 month group.

229 cards, $1,832 in card costs.

Checkpoint

You review the results and we refresh the counts from the latest extract.

Stage 2

Card-level list for the 12+ month group.

As of Sept 30, 2026: 211 cards, $1,688. Final count and cost set at the checkpoint.

The question you may be asking: "why hire a firm for 440 cards?"

This is not a one-time list: counts and costs shift as cards near expiration

Today's Snapshot	What Changes	What We Do About It
As of Sept 30, 2026: 440 cards, $3,520 in card costs	Cards move closer to expiration, so some drop out of the early batch because they will renew for free.	The checkpoint refreshes the count and cost from the latest extract before Stage 2.

Please approve Stage 1 today: 229 cards, $1,832 in card costs, based on September 30 counts

Stage 2 stays open until we bring you the refreshed count and cost.
